

Construction Sequence for Erosion Control

1. Contractor shall prepare and submit a CBMPP and obtain a land disturbance permit from appropriate authority. Plans must meet all requirements of the Alabama Handbook for Erosion Control, Sediment Control, Stormwater Management, Construction Sites and Urban Areas.
2. Prior to clearing site, contractor shall begin by installing construction fence and all perimeter silt fences.
3. All existing streams shall be protected from silt and erosion. Installation measures shall include silt fences, hay bales, & temporary sediment basins.
4. Contractor may not begin clearing, grubbing and other earthwork operations on site.
5. Water from site shall be directed to temporary sediment areas as conditions determined by the qualified professional prior to being released to the stream.
6. Sidewalks, driveways, sidewalks, building exterior at grade or near grade shall be provided with ground cover, materials, structures sufficient to restrain erosion within 13 days of completing grading activities. Temporary grassing or permanent grass shall be installed to mitigate the effects of rain on the subgrade or finished grade.
7. Once all land disturbance has been completed and all disturbed areas are stabilized, contractor to notify permitting authority for final inspection of site.
