GSWCC EROSION CONTROL NOTES:

The design of erosion control measures shall be based on the installation of erosion and sediment control measures and practices prior to, concurrent with, and following activities.

Erosion control measures will be maintained at all times. If full implementation of the approved plan does not provide for effective erosion control, additional erosion and sediment control measures shall be implemented to control or treat the sediment source.

Any disturbed area left exposed for a period greater than 14 days shall be stabilized with mulch or temporary seeding.

Any amendments/revisions to the ES&SPC Plan which have a significant effect on BMPs with a hydraulic component must be certified by the design professional.

Maintenance of all soil erosion and sedimentation control measures and practices, whether temporary or permanent, shall be at all times the responsibility of the property owner.

PHASE 3 DISTURBANCE: 14.5 ACRES

EROSION, SEDIMENTATION, AND POLLUTION CONTROL PLAN CERTIFICATION:

I certify that the permittee's Erosion, Sedimentation, and Pollution Control Plan provides for an appropriate and comprehensive system of Best Management Practices (BMPs) required by the Georgia Water Quality Control Act and the document "Manual for Erosion and Sediment Control in Georgia" (Manual) published by the State Soil and Water Conservation Commission as of January 1 of the year in which the land-disturbing activity was permitted, provides for the sampling of the receiving water(s) or the sampling of the storm water outlet and that the designed system of best management practices and sampling methods is expected to meet the requirements contained in the General NPDES Permit No. GA0100001.

Unless/Unless shown on the Construction documents, items are shown as shown and unless the site owner/owner or the owner assumes any responsibility for reliance on these items. This plan may not show utility lines or structures shown on files located on site. Contractor shall be responsible to locate and use the services of a private utility locator line during the entire course of work and shall pay for and operate. Contractor shall locate utility prior to any disturbance involving any utility located on site to include all water, gas, electric, and sewer. Contractor shall verify the site design professional of any utility located on site to include all water, gas, electric, and sewer. The Contractor, at their expense, shall be responsible to locate, locate, and/or maintain, in accordance with all utility regulations, whether shown or not. Acceptance, approval, etc. of utilities shall be coordinated with the respective utility company.
