

UL L570 - 1 HOUR FLOOR / CEILING

1. Flooring System - The flooring system shall consist of one of the following:

- Subflooring - Non 1932 in. thick wood structural panels installed perpendicular to the joists with joints staggered. Plywood or panels secured to joists with construction adhesive and No. 60 ringed shank nails, spaced 12 in. OC along each joint. Staples having equal or greater withdrawal and lateral resistance strength may be substituted for the nails.

- Subflooring - Non 1932 in. thick wood structural panels installed perpendicular to the joists with joints staggered. Plywood or panels secured to joists with construction adhesive and No. 60 ringed shank nails, spaced 12 in. OC along each joint. Staples having equal or greater withdrawal and lateral resistance strength may be substituted for the nails.

- Subflooring - Non 1932 in. thick wood structural panels installed perpendicular to the joists with joints staggered. Plywood or panels secured to joists with construction adhesive and No. 60 ringed shank nails, spaced 12 in. OC along each joint. Staples having equal or greater withdrawal and lateral resistance strength may be substituted for the nails.

- Subflooring - Non 1932 in. thick wood structural panels installed perpendicular to the joists with joints staggered. Plywood or panels secured to joists with construction adhesive and No. 60 ringed shank nails, spaced 12 in. OC along each joint. Staples having equal or greater withdrawal and lateral resistance strength may be substituted for the nails.

- Subflooring - Non 1932 in. thick wood structural panels installed perpendicular to the joists with joints staggered. Plywood or panels secured to joists with construction adhesive and No. 60 ringed shank nails, spaced 12 in. OC along each joint. Staples having equal or greater withdrawal and lateral resistance strength may be substituted for the nails.

- Subflooring - Non 1932 in. thick wood structural panels installed perpendicular to the joists with joints staggered. Plywood or panels secured to joists with construction adhesive and No. 60 ringed shank nails, spaced 12 in. OC along each joint. Staples having equal or greater withdrawal and lateral resistance strength may be substituted for the nails.

System No. 12

- Subflooring - Non 1932 in. thick wood structural panels installed perpendicular to the joists with joints staggered. Plywood or panels secured to joists with construction adhesive and No. 60 ringed shank nails, spaced 12 in. OC along each joint. Staples having equal or greater withdrawal and lateral resistance strength may be substituted for the nails.

- Subflooring - Non 1932 in. thick wood structural panels installed perpendicular to the joists with joints staggered. Plywood or panels secured to joists with construction adhesive and No. 60 ringed shank nails, spaced 12 in. OC along each joint. Staples having equal or greater withdrawal and lateral resistance strength may be substituted for the nails.

- Subflooring - Non 1932 in. thick wood structural panels installed perpendicular to the joists with joints staggered. Plywood or panels secured to joists with construction adhesive and No. 60 ringed shank nails, spaced 12 in. OC along each joint. Staples having equal or greater withdrawal and lateral resistance strength may be substituted for the nails.

- Subflooring - Non 1932 in. thick wood structural panels installed perpendicular to the joists with joints staggered. Plywood or panels secured to joists with construction adhesive and No. 60 ringed shank nails, spaced 12 in. OC along each joint. Staples having equal or greater withdrawal and lateral resistance strength may be substituted for the nails.
