

## General Notes

1. J-Trim provided by G.C. on all outside corners of wallcovering locations.  
All mounting to drywall by G.C. Subcontractor.
2. Level 5 finish on all drywall at wallcovering location required. Wallcovering shall be installed behind rubber base.
3. Areas containing graphic elements should be free of electrical and/or low voltage outlets.
4. All dimensions should be field verified by the manufacturer prior to production.
5. All production art for custom printed wallcovering to be provided by SMALLWOOD with 1.5" bleed at all edges. Installation in all areas should be completed from center of graphic to maintain design intent.
