GENERAL NOTES
 The Architectural drawings must be read in conjunction with the CIVIL, STRUCTURAL, MECHANICAL, PLUMBING, FIRE PROTECTION, and ELECTRICAL drawings. The Contractor is responsible for all coordination between the drawings. Discrepancies should be brought to the attention of the architect.
 The Contractor is advised that the available space for routing all electrical, mechanical, plumbing, fire protection and communications piping, conduits, trays and ductwork may be limited in many locations. The Contractor shall coordinate all of the trades work and make adjustments, with the Architect's approval, to the routing of these items as required. Any rework resulting from the failure to coordinate will be performed by the Contractor at no additional cost.
 All dimensions are from face of stud, u.n.o.
 All penetrations of fire rated assemblies shall be fire blocked and sealed per UL approved methods.
 All concealed fire rated assemblies shall be provided with signage indicating the type of assembly and the fire rating where in letters no smaller than 2" high. See 101.2.
